Version 1.0 | Dragon King

Dragon King COIN

Cryptocurrency designed to assist our active and retired military members needs.

The team behind Dragon King Coin has set out to make a major difference in the lives that have protected us day in and day out.

Dragon King Coin is a charitable ERC-20 token that has a bold mission: partner with the true influencers, our military men & women, promote their story, & as a result we are able to help protect the lives that have protected us and our freedoms.

Suicide, brain injuries, PTSD, physical ailments, poor adjustment after combat exposure; these are just a few of the issues that our military men and women face everyday, yet are not front page issues until it is too late. Our project is to design a coin that will eventually be utilized by worldwide veteran owned companies whose values align with our project- bringing these disguised issues to the forefront.

Three percent of every transaction is gifted to the charity wallet. Suicide awareness will be a constant focus of ours, yet we will also add in additional projects to contribute to the needs of our vets.

In addition to the charity wallet, we have designed our token economic structure to entice long term holders, and bring longevity to the project.
